EXPERIENCE

Tech Team Member

Kashiyatra Cultural Fest, IIT BHU | Varanasi, UP | October 2025

(Commits and Contributions under: github.com/SoorajBHU)

- Built and set up the routing for key frontend pages, including the Competitions, Events, and Merch sections.
- Improved the website's UI by adding interactive elements like parallax hover effects, CSS animations, and footer updates.
- Sped up page load times by compressing large image assets and patched critical pre-launch bugs, including a broken logout flow and rendering issues on the teams page.

PROJECTS

Developer Career OS

Frontend React Application | Capstone Project

- Engineered a comprehensive, frontend-driven dashboard application to track technical skills, project milestones, and job application pipelines.
- Implemented persistent state management and data storage using React Hooks (useState, useEffect) and browser localStorage to ensure seamless data retention across sessions.
- Developed dynamic application routing using react-router-dom and built an interactive analytics dashboard that aggregates and visualizes live user data, including a custom check-in streak tracker.

Tech: React / Tailwind CSS / local Storage / Routing

FairShare Splitter

HackOverflow Hackathon | Prastuti 2026 | March 2026

- Developed a dynamic web application to calculate and settle shared group expenses using **React**.
- Built reusable UI components for user input, individual expense tracking, and settlement logic.
- Managed dynamic balance updates and application state using **React Hooks**.
- Designed a responsive, mobile-first interface utilizing **HTML** and **CSS**.
- Version-controlled the project using **Git** and successfully presented the prototype at the HackOverflow hackathon.

Tech: React / Tailwind CSS / HTML / JS

Gamified Study Planner

Full-Stack Web Application | July 2025

- Developed a full-stack web application using **Python** and **Flask** to incentivize productivity through a gamified task-tracking and leveling system.
- Engineered secure user authentication, including registration, login, and password management, alongside a personalized user dashboard.
- Integrated a backend database to persist user profiles, tasks, and experience points across sessions.
- Successfully deployed the fully functional application to a live public URL for real-world user access

Tech: Python / Flask / Jinja / HTML / SQLite / Backend / Authentication

EDUCATION

Indian Institute of Technology (BHU), Varanasi Bachelor of Technology in Electrical Engineering | [May, 2028]

TECHNICAL SKILLS

- **Languages:** C++, JavaScript, HTML5, CSS3
- **Frameworks:** React.js
- **Developer Tools:** Git, GitHub, VS Code
- **Core Concepts:** Data Structures & Algorithms, Object-Oriented Programming

SUMMARY

Motivated Electrical Engineering student and recent Full-Stack Development bootcamp graduate with hands-on experience building functional web applications. Seeking to leverage strong problem-solving skills, background in engineering, and experience managing technical operations for major events to contribute effectively to a dynamic software development team. Passionate about creating impactful user experiences through clean, efficient code.
